PROFESSIONAL SUMMARY

FP&A and Finance Analytics professional with 8+ years of experience across audit, accounting, financial planning, and business intelligence, including 4+ years in a fast-growing, multi-entity sports and education group across the UAE, Qatar, and KSA.

Built a centralized Power BI reporting ecosystem that reduced reporting time by **85%** and eliminated manual reporting processes.

Partner with senior leadership to transform fragmented financial and operational data into decision-ready insights, supporting performance management, forecasting, and strategic decision-making.

CORE COMPETENCIES & TECHNICAL SKILLS

FP&A & Business Partnering: Financial Planning & Analysis · Budgeting & Forecasting · Variance Analysis · Rolling Forecasts · Management Reporting · KPI Design

Financial Modelling & Valuation: 3-Statement Modelling · Scenario & Sensitivity Analysis · DCF · M&A Due Diligence · Working Capital Analysis

Accounting & Compliance: IFRS-Compliant Reporting · AP/AR & GL Management · Intercompany Reconciliations · VAT & Corporate Tax Compliance · Microsoft Dynamics 365 · Zoho

Business Intelligence & Automation: Power BI (Advanced DAX) · Power Query · Data Modelling & ETL · AI-Assisted Automation · SQL · Python (Analytics)

PROFESSIONAL EXPERIENCE

Financial Analyst · Hamilton Aquatics Group *Dubai, UAE*

Nov 2024 – Present

Reporting & BI Automation:

Built a centralised Power BI reporting ecosystem, reducing monthly reporting cycles by 85% and providing senior management with real-time KPI visibility.

FP&A & Performance Management:

Owned rolling forecasts, annual budgeting, and monthly variance analysis, supporting leadership with timely insights for performance tracking and decision-making.

Cash Flow & Financial Control:

Managed IFRS-compliant financial reporting, liquidity planning, and cash flow tracking, while ensuring VAT and corporate tax compliance across multiple entities.

Financial Modelling:

Designed dynamic driver-based models for scenario and sensitivity analysis, reducing reforecast cycle time from days to hours.

AI-Assisted Process Automation:

Developed AI-assisted Python automation for month-end close processes, reducing closing time by 2 days while improving accuracy and efficiency.

Business Partnering:

Built Power BI dashboards and KPI reporting for commercial and operations teams, turning operational data into actionable performance insights.

M&A Support:

Contributed to valuation and buy-side M&A due diligence, including EBITDA normalisation and quality-of-earnings analysis.

General Accountant · Hamilton Aquatics Group *Dubai, UAE*

Nov 2022 – Oct 2024

Full-cycle Accounting & Reporting:

Managed AP, AR, and GL accounting across group entities in MS Dynamics 365 & Zoho — including invoicing, collections, and inter-unit reconciliations — ensuring accurate, IFRS-compliant financial records.

Working Capital Monitoring:

Performed AR/AP aging analysis and identified overdue exposures, providing cash flow recommendations that improved visibility and supported liquidity management decisions.

Reporting Automation:

Automated recurring reports using Power Query and Power Pivot in Excel, streamlining data consolidation ahead of manual reporting cycles.

Management Reporting Support:

Prepared monthly management accounts and financial statement inputs across a multi-entity structure, ensuring timely reporting to meet strict month-end deadlines.

Financial Controls & Compliance:

Managed bank reconciliations, PDCs, petty cash, and VAT-compliant refund and tax credit note processing, coordinating with external auditors to achieve zero material audit findings across all cycles.

Audit Associate · AH Accountants *Pakistan*

Mar 2018 – May 2022

Audit & Assurance:

Performed external audits and financial statement reviews across multiple clients and industries, including substantive and analytical procedures.

Financial Statement Analysis:

Analysed financial statements, ledgers, transactions, and supporting documentation to identify errors and unusual movements across a diverse client portfolio.

Audit Documentation & Client Coordination:

Prepared audit working papers and worked directly with clients to obtain information, resolve accounting issues, and meet audit deadlines.

Internal Controls:

Evaluated the design and operational effectiveness of accounting processes and internal controls, communicating findings and recommendations to management.

PORTFOLIO PROJECTS

Individual & Consolidated Financial Statements in Power BI — Built a single Power BI solution to view individual entity financial statements and consolidated group financial statements in one place, with intercompany eliminations and non-controlling interest adjustments. View Project

FP&A & Financial Performance Dashboard — Developed an integrated Power BI dashboard suite covering sales, customer behaviour, profitability, and accounts receivable ageing. Built DAX-driven Revenue-to-EBITDA bridges and interactive what-if scenarios to analyse performance, assess financial outcomes, and support forecasting and decision-making. View Project

Financial Reporting in Power BI — Built a full 3-statement automated reporting model in Power BI enabling real-time financial visibility and scenario analysis. View Project

Integrated 5-Year Financial Modelling & Valuation — Built an integrated five-year financial model linking the income statement, balance sheet, and cash flow statement, with scenario analysis, sensitivity tables, and supporting DCF valuation schedules to assess business performance and enterprise value under different assumptions. View Project
